Flexible Nylon High Pressure Misting Systems

High Pressure
Nylon Tubing

Tubing Cutter

Push to Connect
Misting Tee Fittings

Misting Pump Quick
Connect Fitting

Plastic Misting Nozzles

Mounting Clamps

Misting Elbow

- Attach to any high pressure misting pump
- Misting nozzle spacing is customizable; you cut the tubing to determine spacing between misting nozzles
- “Push to Connect” style fittings make installing the misting system quick & simple
- Capable of making fogging effects
- Plastic misting nozzles with internal mesh screen filters to prevent nozzle clogging
- Plastic misting nozzles are chemical and corrosion resistant; actually outwear brass misting nozzles!
- Available in 10’, 25’, and 50’ lengths. Kits can be combined to make longer misting systems

Our High Pressure Flexible Nylon Misting Systems are a great way to beat the heat on your patio this summer. They are also ideal for other misting applications such as dust and odor control. The misting system is completely customizable and you get to cut the Nylon tubing to determine the exact spacing between each individual misting nozzle. “Push to Connect” style fittings make installing this misting system quick and simple.

The High Pressure Nylon tubing and fittings have a burst pressure of over 3,000psi. With the use of high pressure water from a misting pump, you can also achieve fogging effects from the mist to enhance any outdoor landscape. High pressure misting systems are the best type to have in dry climates where the humidity is low. These areas can have the real feel temperature lowered by as much as 35°F through the use of a high pressure misting system. Each misting nozzle has its own built-in mesh screen filter to prevent nozzle clogging which is common with inferior misting nozzles. Our plastic misting nozzles are chemical and corrosion resistant and will outlast brass nozzles!
