Flexible Nylon Low Pressure Misting Systems

High Pressure
Nylon Tubing

Tubing Cutter

Push to Connect
Misting Tee Fittings

Garden
Hose Swivel

Plastic Misting Nozzles

Mounting Clamps

Misting Elbow

- Attach to any garden hose
- Ideal for patio mist cooling, dust control, odor control, and other misting applications
- Misting nozzle spacing is customizable; you cut the tubing to determine spacing between misting nozzles
- “Push to Connect” style fittings make installing the misting system quick & simple
- Nylon tubing, fittings, and misting nozzles are rated for high pressure. Easily convert this low pressure misting system into a high pressure misting system by purchasing a misting pump.
- Corrosion resistant plastic misting nozzles feature internal filters to prevent nozzle clogging and damage
- Available in 10’, 25’, and 50’ lengths. Kits can be combined to make longer misting systems

Our Low Pressure Flexible Nylon Misting Systems are a best seller. The ability to customize the nozzle spacing by cutting the tubing to whatever length you need between nozzles and the ability to convert this misting system into a high pressure misting system later on, make it one of our best sellers. This misting system is perfect for mist cooling, dust control, and air conditioner mist cooling applications.

If you decide to upgrade this low pressure misting system into a high pressure misting system later on, all you have to do is replace the garden hose swivel with a quick connect fitting for your misting pump. The Nylon tubing, misting nozzles, and fittings are all rated for high pressure with burst ratings of over 3,000psi! The “Push to Connect” style fittings make installing this misting system quick and simple. Our plastic misting nozzles are chemical and corrosion resistant, meaning they will outlast brass nozzles! Each misting nozzle has an internal stainless steel filter to prevent nozzle clogging which is common with inferior misting nozzles.
